

#	Steps
---	-------

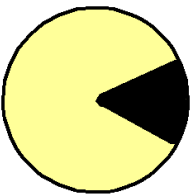

- | | |
|---|---------------------------------------------------------|
| 1 | Create a background with a border that looks like this: |
|---|---------------------------------------------------------|

- | | |
|---|-------------------------------------------------|
| 2 | Create a new sprite for your Pac Man character: |
|---|-------------------------------------------------|

- | | |
|---|-------------------------------------------------|
| 3 | Create a new costume for the Pac Man character: |
|---|-------------------------------------------------|

4 Face this way, Pac Man!

Control the direction that Pac Man faces:

Up arrow		face up (0°)
Down arrow		face down (180°)
Right arrow		face right (90°)
Left arrow		face left (-90°)

5 On Your Mark...

When the green flag is clicked, make Pac Man start in the center and facing to the right.

6 Get set... Animate the CHOMP!

When the green flag is clicked, make Pac Man “chomp” continuously (open and close mouth)

How can you control how fast the mouth opens and closes?

7 GO!

When the green flag is clicked make the Pac Man move in the direction it is facing until he touches the colored border (or colored obstacle). If the Pac Man touches the colored border, move it back in the opposite direction by the same number of steps.

How can you control how fast the Pac Man moves?
